Stay Clean, Be Safe.

- Less Worry
- Healthier Environment
- 24/7 Self Cleaning
- Safe, Non-toxic Materials

The Sands Maintenance Team offers NanoSeptic touchpoint products creating a completely safe & clean commercial space from the ground up.

Why use 'NanoSeptic' Self-Cleaning Technology?

- Less Worry
- Healthier Environment
- 24/7 Self Cleaning
- Safe, Non-toxic Materials

The New Clean means continuously self-cleaning surfaces. It means safe, non-toxic materials. It means turning dirty, high traffic public touchpoints into clean surfaces you can see.

NanoSeptic Skins and Mats turn dirty high traffic, public touchpoints into continuously self-cleaning surfaces. Powered by light, NanoSeptic surfaces utilize mineral nano-crystals which create an oxidation reaction stronger than bleach. Working 24/7, the surface continually oxidizes organic contaminants.

Contact us today to find out how NanoSeptic can be your first step toward creating a self-cleaning environment.

Our NanoSeptic Products

Facility Touch Point Skins* - 25 per Pack

Wide Door Push Bar Great for horizontal tubular push bars or square push bars on self-locking doors.

PB05 Size 3.6" x 12"
PB02 Size 4" x 18"

Door Push/Pull Handle Wrap

This medium size skin can be used on lots of different touch points, but it's perfect for the square push plates and square pull handles on many glass doors.

PB06 Size 4" x 9"

Door Push Pad

Durable and easy to apply and replace, just peel and stick. Perfect for any push door used in bathrooms, locker rooms, cafeterias, or on other high traffic entry/exit doors.

PP01 Size 6" x 9"

Door Handle Wrap

Super pliable to wrap around tubular door pull handles. These wraps come in two sizes to fit most uniform door handles. Can also be easily trimmed to fit smaller handles.

HW01 Size 4" x 6" Fits 1" to 1.25" diameter handles

HW02 Size 3" x 4"
Fits less than 1" diameter handles

*Facility Touch Point Skins are available in two designs: Green Leaf (pictured) or Brushed Aluminum. View the two designs at our online store www.nanoseptic.com

Our NanoSeptic Products

Door Handle Sleeves - 20 per Pack

Slip-On Door Handle Sleeves

These self-cleaning sleeves are perfect for ADA door handles which are required in most commercial buildings and schools. They last 90 days and are easy to install and remove. Just spray door handle with a little Windex and they slide right on.

SL01 Size: 4" length Custom sizes available.

Elevator Button Covers

Elevator Button Covers

These clear plastic button covers turn high-traffic public elevator buttons into continuously self-cleaning surfaces. Just peel and stick. Sold in sheets of 25 buttons. Includes NanoSeptic label to inform people that the buttons are self-cleaning.

ELEV01 Size: 0.9" diameter

Touchscreen Film

Clear Film for Touchscreens

From restaurant checkout to hospital and airline kiosks, this NanoSeptic film turns any touchscreen into a continuously self-cleaning surface. Low tack adhesive provides a more secure installation than traditional static cling. Can be cut to fit any size screen. The touchscreen shown has a label identifying the screen as a NanoSeptic surface. This label is included in all clear film orders.

FILM01 Size: 12"x18"

FILM02 Size: 9"x12"

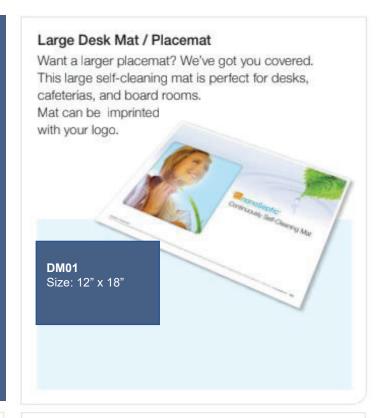

have small bubbles after installing. This will not affect the operation of the touchscreen.

Cellf Defense

Great for any phone,
tablet or electronic
device, these NanoSeptic
self-cleaning feet stay
clean and keep devices off of dirty
surfaces. They are easy to apply –
simply peel and stick to the four
corners of your device.

Jumbo Sheet

This jumbo sheet is perfect for custom applications where you want to cut your own size peel-and-stick touch points. Grid lines at 1/2" and 1" make measuring and cutting custom size skins easy. And "NanoSeptic Self-Cleaning Surface" is repeated over the entire surface, so no matter how you cut it, the surface will always communicate its value.

SH01 Size: 12" x 18"

Frequently Asked Questions (FAQ)

How does the NanoSeptic Surface work?

One of the components of the surface is a mineral nano-crystal which acts as a catalyst, charged by visible light. These nano-crystals create a continuous oxidation reaction stronger than bleach. This oxidation reaction breaks down organic material into base components such as CO2. The surface also forms free radicals which act as an additional cleaning agent.

What do you mean by "self-cleaning"?

The NanoSeptic surface continuously oxidizes organic contaminants at the microscopic level. Large scale contaminants must still be removed to allow the surface to do its job. This is similar to disinfectants, which require surfaces to be cleaned before the disinfectant can be effective.

How should I clean NanoSeptic surfaces?

NanoSeptic surfaces are not affected by traditional non-abrasive cleaners. We recommend wiping the surface with a microfiber cloth and water to remove large-scale contaminants. Do not use abrasive cleaners or cleaning utensils which might compromise the NanoSeptic surface.

How long do NanoSeptic products last?

We recommend replacing facility touch point skins every 90 days (quarterly). In some high traffic applications, they may need to be replaced more often. Mats, v and tissue box covers should be replaced annually. Nothing gets used up or expires, so the products' shelf life is virtually unlimited. Product life is dependent on actual physical wear.

How do I know when to replace NanoSeptic surfaces?

The easiest rule to follow is to replace the skins quarterly and the other products annually. However, the print serves as a wear indicator, so if the text or graphics become worn or faded, it's time to replace. Also, if the skins start to peel off, we recommend replacement to keep the touch point looking good.
